## **Kodak Responds to Corporate Demands For High Speed Transactions with Company's Fastest Document Scanner and Upgraded Capture Software**

### **KODAK i1860 Scanner Scores Early Orders with Productivity-Focused Speed and Design**

ROCHESTER, N.Y., October 5, 2006 — Eastman Kodak Company has introduced a new document scanner and an upgrade to its Capture Software, both designed to meet the high production needs of paper-intensive environments.

The KODAK i1860 Scanner captures images at up to 200 pages per minute, making it the fastest production scanner offered by Kodak. It was designed for maximum productivity, for customers like service bureaus, insurance companies that process claims in a central location, and financial institutions that handle volumes of transactions such as loan and mortgage applications. The scanner efficiently manages documentation with a wide variety of document sizes, colors, and weight.

The company already has orders for its KODAK i1860 Scanner, after offering pre-launch demonstrations last month during the DMS tradeshow in Cologne, Germany. Vienna-based BISS, the largest service bureau in Austria, and Rottenburg-based Heydt-Verlags-GmbH, one of the largest service bureaus in Germany, were among the first to place orders immediately upon seeing the demo.

“As one of the biggest service bureaus, we require speed and robustness as well as ergonomics and ease of use,” said Alexandra Stockl-Paul, Chief Executive Officer of Heydt-Verlags-GmbH. “The new i1860 scanner, together with Kodak hardware support, is an unbeatable bundle for high-quality, high-volume scanning.”

The new scanner was designed for optimum efficiency, both in speed and ergonomics. It features easy-to-use operation for high-production environments, and offers a 10-inch height adjustment, enabling operators to work standing or seated. The scanner's footprint is the smallest in the industry, accommodating highly efficient workflow patterns.

“Research has shown a correlation between employee comfort and productivity, especially when it comes to adjustable workstations,” said Lois Powell, Document Imaging Business Manager with Kodak's Graphic Communications Group. “In the development of the i1860's ergonomic design, we referenced studies like the one conducted by Cornell University's Human Factors and Ergonomic Laboratory, in which more than 80 percent of participants using an adjustable workstation reported a significant increase in overall productivity.”

The KODAK i1860 Scanner has a list price of \$85,000, and will be shipped to customers beginning in December 2006.

In addition, Kodak has introduced the latest upgrade of its image capture software, to support the speed and features of its newest scanner lines for both desktop and production scanning. KODAK Capture Software, Version 6.10, adds MICR code support, augmenting current bar code and optical character recognition (OCR) indexing capabilities. Indexing via MICR code is a critical function of the sorting of checks, making the newest version of Kodak's capture software even more efficient in financial environments.

The new software, which supports the new KODAK i1860 Scanner and recently released i1200 and i1300 Series Scanners, will be available in multi-license discounts for large volume purchases of 50 and 100 seats.

### **About Eastman Kodak Company**

Kodak is the world's foremost imaging innovator, providing leading products and services to the photographic, graphic communications, and healthcare markets. With sales of US\$14.3 billion in 2005, the company is committed to a digitally oriented growth strategy focused on helping people better use meaningful images and information in their life and work. Consumers use Kodak's system of digital and traditional image capture products and services to take, print, and share their pictures anytime, anywhere; businesses effectively communicate with customers worldwide using Kodak's solutions for prepress, conventional, and digital printing and document imaging; creative professionals rely on Kodak's technology to uniquely tell their story through moving or still images; and leading healthcare organizations rely on Kodak's innovative products, services, and customized workflow solutions to help improve patient care and maximize

efficiency and information sharing within and across their enterprises. More information about Kodak (NYSE: EK) is available at [www.kodak.com](http://www.kodak.com).
